EDUCATION

Vivekananda Institute Of Professional Studies - TC, New Delhi

2024 – 2028

Bachelor of Technology in Computer Science with Applied Mathematics (CSAM)

CGPA: 8.5

PROJECTS

•OnlineLo – E-Commerce Web Application

2025

Full Stack Secure Web Application

GitHub

- Developed a **full-stack E-commerce app** using **Spring Boot** and **React** with a **Microservices architecture**, ensuring high availability and modularity.
- Implemented **Spring Security, JWT, and OAuth 2.0** (Google/GitHub) for secure authentication and **Role-Based Access Control** (RBAC) for Admin/Users.
- Optimized **PostgreSQL** for CRUD operations and containerized the entire environment using **Docker** for seamless deployment and scalability.

•RouteGuard – Truck Supply Chain Monitoring System

2025

Real-Time Tracking & Anomaly Detection Web Application

GitHub

- Built a **real-time monitoring system** using **Spring Boot** and **OSRM** to track vehicle movement and detect route deviations via live polyline comparison.
- Integrated **Leaflet.js** for interactive map visualization and implemented a **rule-based alert engine** to notify admins of threshold breaches.
- Designed an **ML-based anomaly detection model** and **risk-scoring system** to classify trips; containerized the suite with **Docker** for portability.

•Space Weather Monitoring System

2026

Real-Time Alert Engine & Data Ingestion

GitHub

- Engineered a **Spring Boot engine** to monitor solar events by integrating live **NOAA APIs** and processing data through a custom alert evaluation logic.
- Implemented **WebSockets** for low-latency, real-time alert delivery to the frontend and automated data ingestion using **Spring Scheduler**.
- Developed a scalable **layered architecture** with **PostgreSQL/JPA** for persistent storage, exposing RESTful APIs for manual and automated triggers.

TECHNICAL SKILLS

- **Programming Languages:** C, Java, Python, JavaScript
- **Frontend Development:** HTML, CSS, JavaScript, React.js, MERN Stack
- **Backend Development:** Spring Boot, Spring Security, REST APIs, WebSockets (STOMP), Microservices, Spring AI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **ORM & Persistence:** Hibernate, Spring Data JPA
- **DevOps & Cloud:** Docker, Kubernetes, AWS EC2, CI/CD
- **Tools & Platforms:** Git, GitHub, Postman, IntelliJ IDEA, VS Code
- **Operating Systems:** Windows, Linux

TECHNICAL EXPERIENCE

- : Built and deployed full-stack applications using **Spring Boot, React.js, PostgreSQL, Docker, and AWS EC2**. Experienced in developing secure **REST APIs** with **JWT/OAuth 2.0**, real-time systems using **WebSockets**, and scalable backend services following **microservices architecture**. Familiar with **CI/CD**, cloud deployment, and backend development tools including Git/GitHub, Postman, Linux, and MongoDB.

CERTIFICATIONS

- **Played with Python** VIPS TC – School of Engineering & Technology
- **Knowledge on Cyber Security** TISCO Financial Group
- **Data Structures and Algorithms – Achieving Excellence in Java** Apna College
- **Spring Frameworks – Achieving Excellence in Java** Udemy

POSITIONS OF RESPONSIBILITY

•**Member**, Technical Society, AARVAK, College

2024 – Present

•**Member**, Theatre Society, RANGMANCH, College

2024 – Present

•**PR and CP Lead**, HackerRank Club, AARVAK, College

2025 – Present
